SELLING OF WAR SHARES REACTS WITH SPECIALTIES

New York, Oct. 4.—Further moderate selling of war shares, including equipments, contributed to the irregular trend in the first half-hour of today's stock market. United States Steel and Crucible Steel reacted a point each with specialties such as Sumatra Tobacco and Texas Company, St. Paul also yielded to the same extent. These reactions were balanced by renewed strength in shipping, Mexican Petroleum and utilities, the latter being represented by Brooklyn Transit, Philadelphia Company, People's Gas and Ohio Gas.

Going among inactive specialties were materially enhanced during the noon hour, motors and utilities deriving the greatest benefit. Leather issues moved contrary to the general trend, however, reacting 2 points, and United States Steel was barely steady.

PRINCE MAX NAMED
AS GERMAN CHANCELLOR

In Addition Two Socialists Have
Been Appointed Members
of Ministry.

Copenhagen, Oct. 4.—Official announcement was made in Berlin today that Prince Max of Baden has been named German chancellor and that two socialists—Herr Groeber and Herr Scheidemann—have been appointed secretaries (members of the ministry) without portfolio.

The German foreign minister will address the Reichstag tomorrow, explaining the government's program.

AUSTRIA-HUNGARY
GROWS BIT WEARY

No Doubt That Turkey Has No-
tified Germany of Her Inten-
tion to Make Peace.

London, Oct. 4.—The Press Association understands that there is no doubt that Turkey has notified Germany of her intentions to make a separate peace with the allies, and there are also signs that Austria is taking sides against the Ottoman empire, the Daily News stated today.

There are suggestions that Austria-Hungary will break with Germany and the possibility exists that Hungary may act alone.

Signs for a break-up of the German alliance are very encouraging.

The Press Association is understood to be very close to official sources of information.

DEFEND MINE FIELDS

American Navy Takes Part in Attack on
Austrian Navy.

Washington, Oct. 4.—Navy department officials today were highly pleased over the part which the American destroyers are reported to have taken in the attack on Wednesday in which the Austrian naval base at Durazzo, on the Albanian coast, in the Adriatic, was destroyed. Italian, British and American destroyers and torpedo craft are reported to have defended the mine fields and entered the harbor, destroying all craft therein, after allowing a hospital ship to leave. The attack was protected by Italian and British cruisers and by seaplanes. So far, an official report has not been received as to what it will be a comparatively easy task to bottle up the Austrian fleet and its German submarine accessories in the Adriatic.

These craft putting out through the straits of Otranto, have been able to interfere at times with the transport service to Salonika. Now that the Durazzo base has been destroyed, the Austrian fleet will be a comparatively easy task to bottle up the Austrian fleet and its German submarine accessories in the Adriatic.

For the present naval officials do not care to identify the American naval craft that took part in the Durazzo fight. It was pointed out today that with Durazzo destroyed as a naval base, transport through the Mediterranean will be comparatively safe from now on and that should it become necessary to send reinforcements to Salonika or in the event of Turkey's quitting the war, through the channels into the Black sea, to aid Rumania, the submarine menace will have been rendered almost negligible.

BELGIAN CAR RETURNS

Havre, Oct. 4.—A Belgian armored car has succeeded in entering Rouen and has returned safely to its own lines, according to the Belgian official communication last night.

BERLIN WHINES AND WAILS

Life in German Capital Just One Regu-
lation After Another.

Life in Berlin, it would seem, is anything but a gay and festive affair. The sense of personal liberty has never been one of the things that the visitor to Germany attributes to the Berliners, even in the best of times; now, however, he seems to have discovered that he has lost it among other things. The following passages from an editorial in the Lokai Anzeiger would engage our sympathies had we not in the background visions of Belgium and northern France. Says the writer:

"Unscrupulous profiteering and utmost patriotic economy, devoted self-interest and brutal egotism run side by side. At the front, where the efforts and privations demanded are greatest and death's shadow the most appalling, we find the most cheerful and also the most disciplined of spirits. We at home have our beds, and live in security on slender but sufficient rations, yet—what dissatisfaction, what peculiar moods, crystallizing into opinions, we meet with! Why is this?"

"The root of the evil lies in the numerous rules and regulations, fines and punishments, which put unbearable pressure upon us and suffocate our sense of personal liberty and personal possession. So many foolish things are forced upon us that we feel depressed from sheer defenselessness, and this depression spreads and shows itself where greater national questions are at stake."

"There is, first of all, the famous clothes regulation, which will probably end in wardrobe regulation, although we have been assured that we shall not come to that. But so far, whenever we have had these assurances, the opposite has happened! We were told that whoever gave a suit voluntarily would be exempt from wardrobe requisition. We gave our suits, and received in return a printed notice that the suit would be called in our favor in case of wardrobe requisition. In ordinary life these methods are called by their proper name; they do not serve to strengthen our confidence in officials who are allowed to invent and carry them out."

DEATH OF OILS IN GERMANY
CAUSES MANY RAIL WRECKS

Amsterdam, (N. E. A.).—Deaths of fats and oils is noticeable throughout Germany, and frequent railway accidents are due to hot bearings caused by insufficient lubrication. Locomotive repair shops are unable to keep up with the repairs. Coal, iron and timber are disappearing, and while money is plenty, financiers realize that without large indemnities, Germany will be insolvent when the war ended.

PARIS WORKERS HAIL PEACE
PLEA COMING FROM BULGARIA

Paris. (Copyright, N. Y. World).—Four thousand workmen of the Andre Citroen factory shouted hurrahs when they were told by Samuel Gompers that Bulgaria had asked Gen. D'Esperay, commanding the Allied forces in Bulgaria, to call an armistice and to discuss peace.

American Ambassador Sharn and the American delegation to the War Council Federation had lunch in the huge factory canteen, having the same menu as the workers. And then they then introduced Samuel Gompers to his employees, after which Mr. Gompers in a short speech, asked the French factory hands to join together until justice and liberty once more rule the world.

There was loud cheering and applause as Mr. Gompers left the factory on his way to visit the French and American fronts.

COTTON OPENED LOWER BUT SOON RALLIED

New York, Oct. 4.—The cotton market was nervous and irregular during today's early trading. The opening was easy at a decline of 17 1/2 points under Liverpool cables and a favorable weather map. There were rallies of a few points right after the call on covering and the favorable war news, but the market soon eased off again, with December selling at 31.82c and January 31.60c before the end of the first hour, or about 46 1/2 points net lower.

Fluctuations were narrow and irregular later in the morning. The bulges seemed to meet cotton from one source or another, and there was bearish sentiment around the ring on the favorable weather and indications of increased southern offerings. Trade interests were moderate buyers on the decline, however, and the market was fairly steady around midday at 31.80c for December and 31.60c for January.

NEW ORLEANS SPOT COTTON.
